Havrilenko Olexii

Skills

- **Frontend:** React, Angular, Vue, Next.js, Nuxt.js
- **Backend:** Django, Ruby on Rails
- **Databases:** MongoDB, MySQL, PostgreSQL
- **DevOps & Tools:** Docker, Git, Bitbucket, Jira, Figma
- **Programming Languages:** JavaScript, TypeScript, C++, Python
- **UI/UX:** Sass, Bootstrap, Playwright

Experience

- JavaScript Full Stack Developer - SOLVVE** 09/2022 - Present
- Specialized in building scalable web applications.
 - Worked with state management, API integration, and modern UI/UX practices.
 - Utilized Jira for task management and collaborated with design teams using Figma.
 - Delivered clean, maintainable code to ensure the long-term success of projects.
 - Technologies used: React, TypeScript, Vite, Sass, MS Dynamics 365, Docker, Git, Bitbucket, Jira, Figma

- Embedded Systems Engineer - Smarthose Solutions** 01/2008 - 05/2022
- Led development of smart control systems for climate, lighting, and energy management.
 - Developed automated solutions for blinds, gates, climate systems, and heat pumps.
 - Managed emergency monitoring systems for gas, water, and security.
 - Technologies used: JavaScript, Python, C++, MySQL, Node.js, QNX, FreeRTOS.
 - Hardware platforms: ESP32, ESP8266, Odroid, Raspberry Pi.

- Full Stack Developer and Team Lead - Ukrassist** 10/2005 - 09/2007
- Developed and implemented a customer database system for an automotive assistance service using PHP.
 - Technologies used: Apache HTTP Server, mod_php, MySQL.
 - Hardware platform: Solaris/Sun OS server, Tainet modems.

- System Network Administrator - DialogBank** 01/2003 - 09/2005
- Designed and implemented security measures (firewalls, VPNs, routing, NAT).
 - Managed traffic monitoring and incident management systems.
 - Ensured compliance with security audits and mitigated vulnerabilities.
 - Technologies: FreeBSD, ipfw, NAT, routing, Apache HTTP Server, mod_php.

- DevOps - Ukrtelecom** 02/1999 - 01/2002
- Maintained critical Internet network infrastructure and managed security protocols.
 - Configured and optimized firewalls, routing protocols, and FreeBSD-based systems for reliable network performance.
 - Ensured secure operations across communication nodes.
 - FreeBSD servers: DialUp cluster, PostgreSQL stats, routing, DNS, client internet access.

Education

- Specialist of Science: **Financial specialist** 1998-2001
Dnipropetrovsk National University.

- Specialist of Science: **Development and Maintenance of Computer Systems** 1994-1998
Dnipropetrovsk College of Welding and Electronics
